

Ram's Leap

The vineyard is planted on the virgin soils of a 2000 year old river bed, rich in alluvial deposits. Situated on the McLaughlin's 4th generation outback sheep station, the vines are maintained on a chemical free basis. Sheep play a crucial role in the vineyard for weed control.

2007 Semillon/Sauvignon Blanc

Flinty mineral characters typical of the terroir add complexity to the citrus and green apple palate.

Vineyards:

70% Semillon - Canonbah Bridge vineyard, Western Plains, NSW. 30% Sauvignon Blanc grown in cool climate, and 1000 metres elevation at Orange, NSW.

Winemaking:

The Semillon is hand picked to obtain maximum acid and a crisp citrus balance. After minimal contact with lees, the wine is fermented in stainless steel tanks.

Technical Details:

Varietals - 70% Semillon, 30% Sauvignon Blanc

Bottling date: January 2008

pH: 3.12

Residual sugar: 0.4g/L

Alcohol: 12.5%

Tasting Note:

Pale straw in colour. Limey citrus flavours dominate the nose. The palate is intense fruit with a well balanced lingering finish. In particular fresh citrus, crunchy snow peas and Passion fruit.

Cellar potential:

Now up to 2 years.
